JACK BOARD panel jacks under the panel (~24 mm deep); 2x8 IDC ribbon to the main board, pin = conductor

H: plated M3 standoffs, they bond CHASSIS (the sleeves) to the panel.
Insert: tip = send, ring = return; unplugged, the ring normal puts the send on the return.
L in: its normals put tip and ring on GNDA when nothing is plugged in.
R in: its normals take the L jack's tip and ring (R normalled to L).

Link pinout = main board CN
Generated with its main board (master_lib.jack_board)
